

DIGITALE LEUTE
SCHOOL

For the successful completion of the

AI Software Engineering Bootcamp

Digitale Leute School hereby awards this certificate, with congratulations, to

Ufuk Dikci

The training to become an AI Software Engineer comprised 636 teaching units (UE).

The content covered the following topics, which were taught both theoretically and through practical exercises by expert instructors:

Product Skills für Engineers

User Centricity & Product Discovery; Business Modeling & Product-Market Fit; Lean Product Management; Stakeholder Management & Storytelling; Backlog Management & Roadmapping

AI Software Engineering Foundations

AI Software Engineer Mindset; Engineering Foundations I: Principles, Patterns & Practices; Engineering Foundations II: Architectures & Timeless Design; Risks, Trust & Compliance: Coding with AI Responsibility

Software Engineering with AI

The Modern AI Stack: Tools, Setups & Best Practices; Advanced Prompt Engineering für Entwickler; Rapid Prototyping mit AI; MVP Development mit AI I; MVP Development mit AI II; Deployment & Monitoring mit AI; Quality & Observability von AI generiertem Code; Clean Code, Refactoring & Robustness

Agentic AI Engineering

Directing Agentic AI, Teams & Managing Risks; LLMs, MCP, LangChain & Vektor-Integrationen; AI- Native Workflow Automation; Context Engineering & Multi-Agent Orchestration; Wie man ein KI-gestütztes Produkt entwickelt

July 14, 2026

Certificate: 188497946
